File Edit View Run Kernel Settings Trusted

Code JupyterLab Python (Pyodide)

```
Sales Data:
  Product  Sales Region
0  Laptop  50000   East
1   Phone  30000   West
2  Laptop  45000   East
3  Tablet  20000  South
4   Phone  35000   West
5  Tablet  25000  South

Shape of DataFrame: (6, 3)

Total Sales by Product:
Product
Laptop    95000
Phone     65000
Tablet    45000
Name: Sales, dtype: int64
```

Try Jupyter!
jupyter.org

[ ]:
```python
import pandas as pd
import matplotlib.pyplot as plt

# Sample sales data
data = {
    "Product": ["Laptop", "Phone", "Laptop", "Tablet", "Phone", "Tablet"],
    "Sales": [50000, 30000, 45000, 20000, 35000, 25000],
    "Region": ["East", "West", "East", "South", "West", "South"]
}

# Create DataFrame
df = pd.DataFrame(data)

# Display DataFrame
print("Sales Data:")
print(df)

# Basic Information
print("\nShape of DataFrame:", df.shape)

# Total Sales by Product
grouped = df.groupby("Product")["Sales"].sum()
print("\nTotal Sales by Product:")
print(grouped)

# Plot Bar Chart
grouped.plot(kind="bar", title="Total Sales by Product")
plt.xlabel("Product")
plt.ylabel("Sales")
plt.tight_layout()
plt.show()
```

Next steps 🏃

This is just a short introduction to JupyterLab and Jupyter Notebooks. See below for some more ways to interact wit
ecosystem, and its community.

Other notebooks in this demo

Here are some other notebooks in this demo. Each of the items below corresponds to a file or folder in the **file brows**

- `Lorenz.ipynb` uses Python to demonstrate interactive visualizations and computations around the Lorenz sy
basic Python functionality, including more visualizations, data structures, and scientific computing libraries.
- `r.ipynb` demonstrates the R programming language for statistical computing and data analysis.
- `cpp.ipynb` demonstrates the C++ programming language for scientific computing and data analysis.
- `sqlite.ipynb` demonstrates how an in-browser sqlite kernel to run your own SQL commands from the noteb
jupyterlite/xeus-sqlite-kernel.

Other sources of information in Jupyter

- **More on using JupyterLab**: See the JupyterLab documentation for more thorough information about how to inst
JupyterLab.
- **More interactive demos**: See try.jupyter.org for more interactive demos with the Jupyter ecosystem.
- **Learn more about Jupyter**: See the Jupyter community documentation to learn more about the project, its comm
how to get involved.
- **Join our discussions**: The Jupyter Community Forum is a place where many in the Jupyter community ask quest
another, and discuss issues around interactive computing and our ecosystem.
